

Welcome feathered friends  
to your garden with this  
new  
**Bird Feeder**

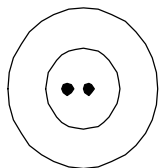

*Shown Right :*  
B1734ABC Springtime Bird Feeder  
**Size:**  
12 1/2" tall x 6 1/4" diameter at widest point.  
**Retail:** \$50.00

This mold set casts in three pieces. The roof which includes the bird topper. The center column. The bottom dish.

After casting place 2 holes for looping wire in the center of the bottom dish. One hole through the birds back about 1/4 inch diameter.

Place 1/4 Hole In  
Birds Back

Place two  
looping  
holes in  
the bottom  
dish

**Finished Assembly...**

Using a 48 inch length of copper wire thread down through the top roof hole, through the column and through one of the holes on the bottom dish.

Bring the copper up through the second hole on the dish and pull loop tight, then up through the column, and then through the roof and back through the hole in the roof.

Twist the copper together and finish off the remaining into a hanging loop.
